Development W
235 peptides; 221 protein groups
122,412 mutation cells
Outer training groups
Fit B: WT PSI ≤4; D: full
Validation: full range
Outer test groups
Full range for both arms
Untouched during selection
Inner group split
Select α / recipe / epoch
using inner MSE only
Fresh refit on permitted
outer training data
Predict outer test
OOF predictions from 5 outer folds
Repeat inner split for seeds 17, 29, 43
Average seed predictions per cell
Development estimates
Peptide-macro metrics
Protein-group bootstrap
Inner-fitted calibration
Separate locked transfer T
Fixed W5-D, refit on W
1,410 peptides; R/A/S only
No LoRA evaluation on T
